The Biotech Alumni faculty group aims at establishing a strong network between former and current D-BSSE faculty members. The board thereby especially follows the following goals:

- Fostering the growing international network of Biotech Alumni
- Organizing events to maintain strong relationships and to further develop the faculty group
- Representing the Biotech Alumni and field of studies
- Creating an exchange platform for students, professors and industry

As a member of the Biotech Alumni faculty group, you can use the following privileges:

- Access to the member database
- Participation at selected events (General assembly, Company visits, Discussion panels, Biotech Alumni BBQ, etc.)
- Included membership in the ETH Alumni Association with unlimited access to their benefits

Biotechnology is a highly interdisciplinary science and is dependent on a lively exchange between academia and industry. Various well known Biotech companies originated as startups from research carried out during graduate studies at academic institutions. Due to the increasing importance and public awareness, ETH had founded the autonomous research department Biosystems Science and Engineering (D-BSSE) in Basel in 2007. Subsequently, the individual Biotechnology degree program has been introduced in 2012.

Being located in the center of the Swiss Biotechnology market, collaborations and synergies between ETH and industry leaders have been established and strengthened since then. To further promote the growth and opportunities of the department, it depends on an increasing number of new and highly motivated researchers and students, as well as on a strong network of Alumni.

Who can join:
Graduates (Bachelor and Master), current and former PhD students, PostDocs, Professors and staff of the D-BSSE are entitled for a membership.
